

I support the right to listen to weather and traffic information on satellite radio. As an XM subscriber I urge you to reject NAB petition 04-160 and support XM radio's ability to broadcast this information.

I'm very weary of special interest groups attempting to block my access to information in their own self interest. Local radio stations offer nothing similare and have no plans to do so. XM radio weather and traffice is a public service and needs to be protected.
